

Inventions Databases

Published: 12.12.2020.

Updated: 03.06.2022.

🔗 The database of patents and patent applications contains full texts of patent applications and granted patents, as well as translations of European patent claims. The publication numbers indicated in the publications section of the database act as hyperlinks to the official gazette in which they are published, while the file documents section contains the respective documents that can be opened.
